Saved in the cloud. Secured forever.

Flexible Hosting Options Geared for the Botswana Business Environment
Affordable, fit-for-purpose hosting designed for peace of mind.

The DataCloud Advantage

Flexibility
Virtual or Dedicated, Managed or Unmanaged: choose the service that suits your needs.

Secure Access
Firewall Protection and customistable access via RDP, SSH, FTP, and others.

BINX Connectivity
Achieve incredible upload and download speeds via Local Access BINX connectivity over fibre or copper.

BC/DR Ready
Add comprehensive Business Continuity or Disaster Recovery services to your hosting plan

Reliability
Our data centres are secured with RFID access control, CCTV, fire supression, backup generators and online UPS Power.

Performance SLAs
Robust SLAs offer guaranteed levels of system uptime, security and support services.

Money Back Guarantee
100% of your monthly subscription refunded if we don't live up to our guarantees.

Professional Support
Industry seasoned technologists are at your service to ensure a smooth and robust hosting experience.

Data Cloud Hosting - Customisable, Scalable, Secure
Reduce your IT management workload with Data Cloud's suite of hosting options. Whether you're looking to turn CAPEX into OPEX, move critical machines offsite, or simply need a quick solution to an urgent need, Data Cloud will curate a service package that meets your exact requirements.

Your Choice of Local Data Center Location
Depending on your office location, you can choose between our Commerce Park or Phakalane locations to host your data. Each facility is equipped with Access Control, CCTV, Alarm System, Fire Suppression, Uninterrupted Power Supply, and Backup Generator.

Virtualised Hosting
Reduce costs and capital expenditure with virtualised hosting. Virtual Machines (VMs) consume less energy, are portable, easy to backup, quicker to provision and deploy, and can help you isolate your applications. Focus your IT budget with flexible pricing plans based on CPU cores or Hard Drive space.

Supported Operating Systems: Microsoft Windows Server (2003 / 2008 / 2012) or Linux (CentOS/Ubuntu)
Recommended For: Exchange, SharePoint, Pastel, FTP, Simple Web Applications, Databases

Dedicated Hosting
For CPU-intensive or high security environments, consider dedicated hardware to host your applications. With dedicated hosting, you get full and exclusive access to the server's hardware capabilities, including CPU, RAM, Disk Space, Networking, and peripherals.

Supported Operating Systems: Microsoft Windows Server 2003 / 2008 / 2012 or Linux (CentOS/Ubuntu)
Recommended For: Banking, GIS, ERP, Complex Web Applications, SaaS

Rackspace
House your own hardware in one of our secure data centers. Data Cloud provides you with storage space in our server cabinet, access to power and connectivity options (e.g. fibre, local access ADSL, or point-to-point wireless).
